DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1- 42 and 70-76, 95 and 96, drawn to a compostable and degradable polymer composition, classified in class 524, subclass 47.
 - II. Claims 43-69, drawn to a method for producing a compostable composition, classified in class 523, subclass 1.
 - III. Claims 77-89, drawn to a method for making a compostable sphere, classified in class 428, subclass 1+.
 - IV. Claims 90-92, drawn to a compostable sphere, classified in class 428, subclass 1+.
 - V. Claims 93-94, drawn to a method of strengthening paper, classified in class 428, subclass 900+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I or IV and II or III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed be made by a materially different process, such as by combining components A, B and in a manner to yield up to 30 wt. % of polymer B and further incorporating a plasticizer.

3. Inventions IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as in formulating a fiber or filament.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising components A, B, C and D wherein A may be any of the polymers set forth at claim 4 and B may be any of the polymers set forth at claim 1, lines 4-12 Also wherein the crosslinking agent may be any of the components set forth at claim 32 and wherein component E may be any of the components set forth at claim 36. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is required to elect an ultimate species for examination purposes including one component from each of components A, B and D.

Art Unit: 1714

6. A telephone call was not made to request an oral election to the above restriction requirement, due to the complexity of the art involved.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 703-308-2435. The examiner can normally be reached on Monday through Thursday 6:30-7:00.
